

Nitesh Kumar

MERN Stack Developer | Full-Stack Developer

✉ nikss26796@gmail.com ☎ +91 86680 69441 📍 Bengaluru, India 🔗 [LinkedIn](#) 🐙 [GitHub](#)

Summary

MERN Stack Developer with hands-on experience building and deploying full-stack applications using **React.js, TypeScript, Node.js, Express.js, and MongoDB**. Experienced in REST API development, JWT authentication, role-based authorization, database design, state management, business rules, validation, debugging, testing, and deployment. Built applications covering e-commerce, order management, customer support workflows, and administrative operations. Brings **5+ years of professional IT experience** in technical support and quality assurance, with strong troubleshooting, root-cause analysis, and problem-solving skills, with a strong focus on scalable solutions.

Skills

Languages JavaScript, TypeScript, HTML5, CSS3	Frontend React.js, React Router, Redux Toolkit, RTK Query, Context API, Vite, Chakra UI, Tailwind CSS	Backend Node.js, Express.js, REST APIs, MCS (Model-Controller-Service) Architecture	Database MongoDB, Mongoose, MongoDB Aggregation
Authentication & Security JWT, HTTP-only Cookies, bcrypt, Role-Based Authorization, Input Validation, CORS	Tools & APIs: Axios, Postman, Thunder Client, Git, GitHub, Cloudinary	Development Practices: API Design, Database Design, Business Rules, Error Handling, Debugging, Testing, AI-Assisted Development	Deployment Vercel, Railway, Render, Netlify

Projects

Full-Stack E-commerce & Order Management Platform

React.js · TypeScript · Node.js · Express.js · MongoDB · Mongoose · Redux Toolkit · RTK Query · React Router · Chakra UI · Cloudinary · Vercel · Railway

- Built and deployed a full-stack e-commerce platform with separate Customer and Admin workflows for products, categories, cart, checkout, orders, reviews, and administration.
- Designed application requirements, business rules, database structure, REST API architecture, and end-to-end customer/admin workflows.
- Developed a TypeScript backend using Express.js, Mongoose, and MongoDB following a Route → Middleware → Validation → Controller → Service architecture.
- Implemented JWT authentication with HTTP-only cookies, role-based authorization, hierarchical categories, product management, cart and address management, checkout, payment workflow, order management, stock handling, and customer reviews.
- Built the React frontend using TypeScript, Redux Toolkit, RTK Query, React Router, and Chakra UI, with reusable responsive components and server-state management.
- Implemented business rules for product availability, cart validation, stock handling, shipping calculation, order status transitions, cancellation, and purchased-product reviews; tested APIs with Postman and Thunder Client.

Customer Support Ticket Management System

React.js · JavaScript · Node.js · Express.js · MongoDB · Mongoose · JWT · Context API · Axios · Netify · Render

- Built and deployed a full-stack customer support ticket management application supporting Customer, Agent, and Admin workflows.
- Implemented JWT authentication, protected routes, role-based authorization, ownership checks, and secure access to role-specific operations.
- Developed ticket workflows with ticket creation, assignment, status management, search, filtering, sorting, and pagination.
- Designed MongoDB/Mongoose data relationships using references and populate, with aggregation pipelines for dashboard analytics and operational metrics.
- Implemented request validation, centralized error handling, reusable React components, Context API for application state, and Axios-based API integration.
- Tested and debugged REST APIs using Postman and deployed the application for production use.

 Experience

Movate

Associate — Quality Assurance

Chennai, India
Feb 2024 - Aug 2025

- Audited technical support calls, emails, tickets, and cases for troubleshooting accuracy, process adherence, documentation, compliance, and customer handling.
- Performed root-cause analysis on recurring quality issues and provided coaching and corrective feedback to improve support quality.
- Prepared quality reports and collaborated with Operations, Management, Client, and Training teams to identify performance and defect trends.
- Applied structured troubleshooting, defect identification, validation, and root-cause analysis to investigate recurring technical issues and improve issue-resolution processes.

Tech Mahindra

Sr. Associate — Quality

Chennai, India
Sept 2021 - Feb 2024

- Audited technical support interactions and tickets, identifying troubleshooting, process, documentation, and compliance issues.
- Conducted calibration, coaching, onboarding, and performance reviews in collaboration with Operations, Client, and Training teams.
- Built an Excel performance dashboard and applied Lean Six Sigma and root-cause analysis to identify operational issues and support improvements in quality, defect reduction, CSAT, and compliance.
- Applied structured problem-solving, defect identification, validation, and root-cause analysis to investigate recurring technical issues and identify process improvements.

Technical Support Specialist

Feb 2020 - Aug 2021

- Provided technical support for telecom, broadband, router, connectivity, mobile, SIM, voice, and roaming issues through phone, chat, and email.
- Diagnosed and documented technical issues using structured troubleshooting procedures, Salesforce, and internal support systems.
- Investigated recurring technical issues by analyzing symptoms, isolating root causes, validating solutions, and documenting resolution steps.
- Recognized with Associate of the Month and Bravo Award for technical troubleshooting and customer support.

 Education

SRM University

Bachelor of Engineering — Mechanical Engineering • 7.2 CGPA
Chennai, India • 2014 - 2018

 Certifications

Full Stack MERN Development

Jun 2025

Lean Six Sigma Yellow Belt

Nov 2022

Masai School

Sparen & Gewinn Consulting

 Awards

Best Quality Analyst

Jan 2023

Tech Mahindra
